

Kyle van Niekerk

Web Developer with 5+ years of experience building responsive websites and web application.

EXPERIENCE

Web Developer | R17 Ventures AG

June 2023 - Present

I design, build and optimise Shopify stores for fast-growing European companies. My role typically involves UX auditing, custom coding features, fixing bugs and engaging with clients directly.

Web Developer | Moxa

October 2019 - May 2023

As a consultant, I assisted many small businesses in building their first online presence with HTML, Shopify, WordPress and Webflow. Eventually I joined a team at Santam Insurance on a contract basis.

Web Developer | Onyx Group Holdings

May 2019 - October 2019

My main responsibilities were designing and developing WordPress websites. I also had to manage and maintain the CMS, the plugins and the extensions. Occasionally I was tasked to design and build HTML emails for their weekly newsletters.

Software Developer Internship | A24 Group

April 2019 - May 2019

This was an internship position at a major Health Tech company. I was responsible for maintaining the MySQL databases and reviewing code written by Senior Developers.
